Food Supplement
Colief® Infant Drops
 For the first few months of life some babies may have difficulty in fully digesting the lactose in milk. This can be an important factor in some babies with colic. **Colief® Infant Drops** helps to break down the lactose in a baby's usual milk (breast milk or infant formula) before the baby is fed, making the milk more easily digestible.
Usage: Colief® Infant Drops can be added to the baby's milk each time you breast or bottle feed. Do not give the drops to your baby directly. Do not give more than 64 drops in any 24 hour period. Please read the enclosed leaflet carefully. Do not use if the seal is broken on the bottle.
Ingredients:
 Aqueous Lactase Enzyme.
Storage: Store at or below room temperature (max 25°C). Once opened keep refrigerated and discard after 6 weeks. Keep out of the reach of children.
Warning: Do not to exceed the recommended daily intake. Food supplements should not be used as a substitute for a varied diet.

Colief®
Infant Drops
 Lactase Enzyme Drops
 Lactase Enzyme Drops for Adding to Breast Milk or Infant Formula to Reduce Lactose Content
 Clinically Proven
 Safe from Birth
 42 Servings
